Services

20% Faster Time to Market with **10,000** Pre-Built Functional Test Cases

IGT's Testing Service Offering

Increased focus of travel companies on better customer service, reducing cost of operations and building new revenue streams is bringing in technological advancements which could lead to quality concerns for travel IT systems. Effective testing of IT applications across Travel domain helps in ensuring quality and seamless operations.

IGT's Testing Center of Excellence (CoE) can help ensure quality of travel technology systems with near zero defect leakage to production at optimized costs. IGT provides end-to-end testing services including test advisory services, functional testing services, non-functional testing services and new-age testing services like SOA testing, mobility testing, application security management and application performance management.

Test Advisory Services
