

Delivering 77.5% efficiency gain through Automating BSP Refund

www.igtsolutions.com

Business Need

- Difficulty in analyzing data for compliance and other metrics
- Misinterpretation of data due to human involvement
- Lack of real-time data consolidation and business insights around compliance and refund details
- Time lag in completion causing backlogs

Client

Our client is one of the top airlines in the US. It provides air transportation services in North America, the Asia-Pacific, Europe, the Middle East, and Latin America. It transports people and cargo through its mainline and regional operations. The client operates a fleet of 770 mainline aircrafts and 559 regional aircrafts with approximately 4,800 flights in a day to 353 airports across 5 continents.

Solution Areas

IGT analyzed the manual nature of the BSP refund process and assessed its automation potential. The following opportunities were identified:

- Using Robotic Process Automation (RPA) for emulating manual processing
- Creating a refund repository for logging and storing the refund application and its status
- Digital dashboard using Tableau for rich representation of information
- Configurable business rule engine to automate decision making

How IGT Automated Decision Making and Reporting

After analyzing the process and the systems involved, IGT developed an RPA based BOT that was able to reduce the effort required to execute this process.

IGT also analyzed opportunities to make the best use of data available and developed an auto-decision making module that would reduce manual workload.

Benefits

- 77.5% efficiency gains over manual process
- Improved tracking
- Better compliance

A summary of the salient features of the solution is as below:

- Automated data extraction and management via Refund Applications Repository
- Automated Daily reporting for Consolidated and Audit Refund applications via email with filtered records to be worked on for that day
- Automated Summary report for business management decision and action
- Dashboard for business insights(trends, aging records, SLA compliant etc.) for improved decision making
- Auto- approval of correct Refund application based on rule-based decision making case
