

# Testing Services

Continuous and Intelligent Validation

# Introduction

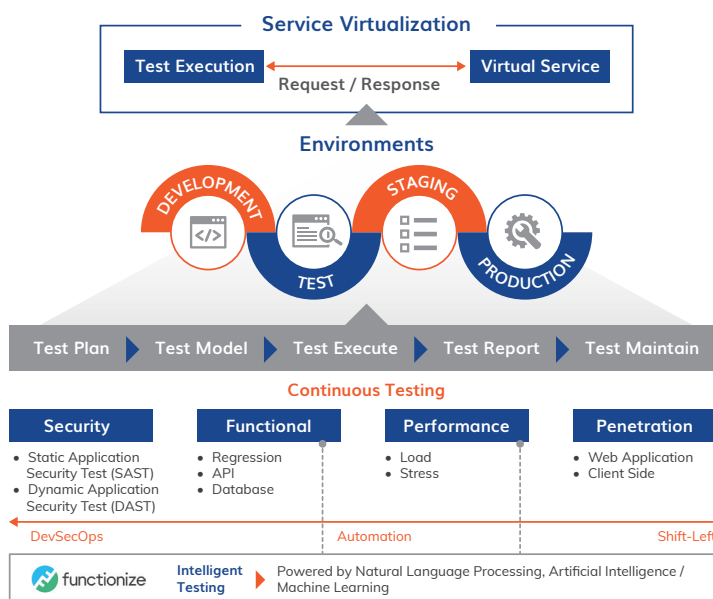

The ever-changing pace of technological innovation is transforming the entire ecosystem of a company. Increased focus on better customer service, reducing the cost of operations, and building new revenue streams is bringing rapid technological advancements. Such is the dependence on technology that even a small IT failure directly impacts the business. Thus, importance of Testing in today's scenario is not overstated.

IGT Solutions (IGT) end-to-end Testing services provide Test Advisory, Functional and Non-Functional Testing, and new age testing services like Continuous and Intelligent Testing powered by Artificial Intelligence / Machine Learning for brands across industries reducing any risk of system failures and ensuring seamless operations.

## Xcelerate Test Model

IGT sees Testing as an enabler to fast-track defect-free application changes from development to production while containing Cost of Quality for businesses.

Xcelerate Test model is tool and technology agnostic that performs functional and non-functional testing services using Intelligent Testing and integrates it with Service Virtualization across environments. Supported with 15,000+ test scenarios and powered by Natural Language Processing, Artificial Intelligence / Machine Learning focusses on shift-left, automation and integration with DevOps.

IGT has partnered with Functionize for Intelligent Testing that dramatically reduces time-to-market and overall testing efforts resulting in significant ROI.

Aligned to >15K Domain Scenarios

Integrates to Development Practices

Spans across Test Methodologies

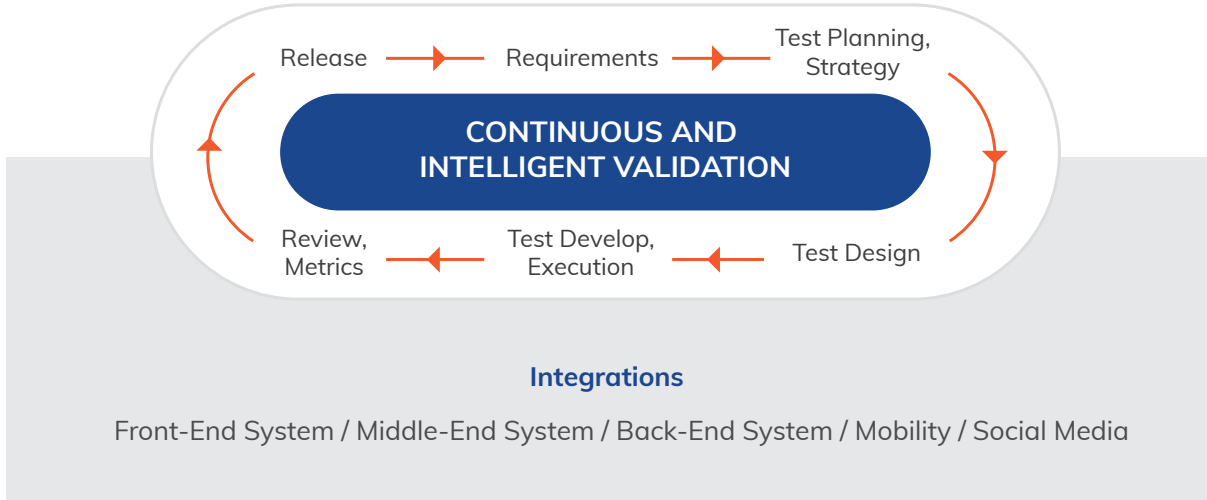

# IGT Testing Services

Through integration of skilled resources, industry knowledge, innovation, and complex delivery experience, IGT Testing Services help organizations compete successfully in today’s high-velocity business world by defining, enabling and maintaining their IT ecosystem.

Test offerings at IGT are categorized under three areas:

Continuous Testing	Service Virtualization	Intelligent Testing
<b>Interlock with DevOps</b> <ul style="list-style-type: none"> <li>• Security Testing (DevSecOps)</li> <li>• Functional Testing</li> <li>• Performance Testing</li> <li>• Penetration Testing</li> </ul>	<b>API Simulation</b> <ul style="list-style-type: none"> <li>• Dynamic responses</li> <li>• Virtualized Integrations</li> <li>• CI/CD pipeline</li> </ul>	<b>AI, Machine Learning</b> <ul style="list-style-type: none"> <li>• NLP Modelling</li> <li>• API and Database Testing</li> <li>• Load and Stress Testing</li> <li>• Integrated to Continuous Testing</li> </ul>

We have customized accelerators, industry domain frameworks and automation suites that improve the time-to-market and reduce Total Cost of Ownership (TCO).

## Customer Benefits

A combination of powerful tools, applied methodologies and industry domain knowledge, IGT Testing Services is more more than just a search for defects.

- 

Increased Efficiency
- 

Defect Detection
- 

Higher Test Coverage
- 

Quick Feedback

# Why IGT Solutions?

- Committed to simplify complex customer interactions while delivering a seamless experience, IGT provides integrated BPM, Technology and Digital Services & Solutions for clients across industries for over 20 years.
- Managing highly differentiated customer experience for 75+ marquee brands globally.
- Employs more than 13,500 customer experience and technology specialists in 5 continents, has 19 state-of-the-art delivery centers, and worldwide operational presence.
