Cloud Computing Services

To bring flexibility and reduce complexity
in your IT environment

IGT's cloud practice helps make the cloud promise real

Cloud Computing is becoming a vehicle for next-generation digital business. It allows organizations to leverage the vast range of technologies to deliver cutting-edge solutions. Cloud brings flexibility, agility, and scalability necessary to compete in a dynamic and changing world. The cost benefits associated with the cloud are lucrative, but the journey to the cloud can be difficult and expensive unless done right.

Whether it is a cloud-shift or cloud-first, IGT works hand-in-hand with the enterprises to drive their cloud journey forward and find new and better ways to harness cloud computing power. We offer consultation, design & validation, transformation & migration, cloud management, and full implementation for various cloud computing types.

- ✓ Infrastructure as a Service (IAAS)
- ✓ Platform as a Service (PAAS)
- ✓ Communication as a Service (CAAS)
- ✓ Database as a Service (DBaaS)
- ✓ Software as a Service (SAAS)

IGT Cloud Offerings

Helps you navigate your cloud journey by supporting your Cloud Transformation Strategy, Roadmap & Implementation

Companies are looking to transform their business with cloud providers like AWS, Microsoft Azure, Google Cloud, etc. We advise our customers to choose the most qualified and right cloud partner for their cloud journey, depending on the business needs. With our end-to-end cloud service offerings, we are helping enterprises redefine the meaning of customer experience.

Our services cover the entire spectrum of cloud solutions and are available for a private cloud, a public cloud, or both - hybrid cloud.
